

Dwarf Pear 'Garden Belle'™

Description

The first truly dwarf pear variety in NZ growing to just 3m tall. An attractive tree with white spring blossoms, glossy summer foliage, turning to golden-orange autumn tones. Suitable for container growing as well as 'in garden' plantings.

Deliciously sweet flavoured fruit with smooth, soft flesh texture, and green mildly russeted skin.

Ripens in mid summer and stores well under refrigeration. Ideal containers of potager gardens

Growing Situation and Care Notes

For the best results plant in full sun with well drained soil. Keep well watered in summer. An organic preventative spray programme is recommended. Application of a balanced fertilizer in early summer will ensure good growth and fruiting. Very little pruning is required for this small tree. Requires a second pear or Nashi variety for cross pollination (a neighbours tree is fine also)

Plant:

Full sun and well drained soil
