

Crazy Daisies

Crazy Daisies flower like crazy! These Federation Daisies come in three delightful soft shades and are literally smothered with the most delightful button-like double flowers. Crazy Daisy 'Pink' is a strong and reliable performer, 'Yellow' displays a profusion of soft butter yellow buttons, and the compact and cute Crazy Daisy 'White'. Plant these and other Federation daisies together or in a mixed perennial border to provide a lift and as excellent fillers. Federation daisies are prolific in their sheer volume and repeat flowering performance

Growing Situation and Care Notes

Crazy Daisies commence flowering in August/September and continue right through the summer to April/May. Preferred position is in full sun, requiring a light pruning after flowering to retain their shape and encourage further flower flushes. While these plants are relatively drought tolerant they may need some watering in the driest periods of Summer or if planted in containers to assure top performance. Once established these plants will be tolerant of light frosts but plants may require some protection in colder areas of New Zealand. Daisies approximately 60cm tall x 60cm wide

Plant:

Full Sun

Where to Buy:

Contact your local garden centre.
