

## Heuchera 'Lime Marmalade'

Heucheras (pronounced hooo-ker-a-s) are a low growing, shade loving foliage plant available in a rainbow of colours. Heuchera Lime Marmalade is a new Selection which was discovered as a 'sport' (or new baby plant if you like!) of it's parent Heuchera, 'Marmalade'. For anyone who has grown Heuchera Marmalade you will know it is a real 'toughie' providing beautiful ruffled foliage evolving through some spectacular colours over the months from early Spring to late Autumn.

### Description

Heuchera Lime Marmalade is 'Super vigorous and full of frills' just like it's mum, 'Marmalade', it is a tough plant and performs equally as well in cool to warmer NZ climates. Compared to 'Lime Rickey', 'Lime Marmalade' features a bigger, "landscape sized" form. With ruffled lime coloured leaves and a large mounding habit it is showy mass planted. Easy to grow with good drainage. An ideal companion to other Living Fashion Heucheras (see montage below left). The full selection of Colour Heucheras can be viewed at [www.livingfashion.co.nz](http://www.livingfashion.co.nz)

### Growing Situation and Care Notes

Grow Heucheras in part shade to full shade. As a rule of thumb the darker the Heuchera the less likely to burn in sunlight so give more shade to lighter foliage varieties. Protect from intense direct sunlight particularly afternoon sun. Avoid water logged soils, ensure good drainage. Water and feed occasionally with slow release fertiliser. Easy care. Hardy.

### Plant Dimensions

Height 40cm high, Width to 45cm

### Plant:

Part to full shade

### Where to Buy:

Contact your local garden centre. For further information [www.inplants.co.nz](http://www.inplants.co.nz)
