

## Scabiosa 'Vivid Violet'

A new and intense colour for a sun loving easy care perennial. Large, vivid violet pincushion flowers are held on sturdy upright stems combined with a low mounding habit. (Right and centre images) Very free flowering blooming continuously from late spring to frost. Forms a compact mat of mid-green foliage. Scabiosa 'Vivid Violet' has shown good mildew resistance in comparative trials. Holds good health and disease resistance right through the growing season unlike older varieties. Vigorous grower prefers full sun and well drained site. Attractive to butterflies.

**Dimensions:** Height to 35cm Width to 45cm  
**Plant:** Full Sun

## Scabiosa 'Crimson Clouds'

Pictured below right, this deep mauve Scabiosa has a much larger more herbaceous habit than 'Vivid Violet' and other pincushion type Scabiosas. The flowers too are large and numerous. Flowers freely from early Spring to the first frosts.

### Growing Situation and Care Notes

Will tolerate full sun and dry conditions but as an observation 'Crimson Clouds' does not like to dry out and is due to it's extreme flower volume a gross feeder so ensure you feed with slow release fertiliser and water regularly through the summer months for best results. Spent flowers can be removed for prolonged flowering

**Dimensions:** Height to 40cm Width to 60cm  
**Plant:** Full Sun

### Where to Buy:

Contact your local garden centre.
