

Acacia 'Limelight'

Acacia cognata 'Limelight'

Description

Acacia Limelight is a very tactile, compact, bushy Acacia with weeping delicate lime green foliage. It's very ornamental and simply excellent when grown as a specimen, in a pot or planter on the deck or patio. Also perfect for mass landscaping, the evergreen foliage and weeping habit make it very appealing for low maintenance year round gardens. Sure to become a NZ classic.

Growing Situation and Care Notes

Full Sun to Part Shade. Low water requirements once established, quite dry tolerant requiring only occasional deep watering during extended periods of heat. Plant in most soil types that are well draining. Pruning generally not required. Feed in spring with a native formulated fertiliser for best results. Will tolerate light frost.

Plant Dimensions

Height to 100cm Width 100cm
