

Colourful Heucheras

Heucheras (pronounced hooo-ker-a-s) are a low growing, shade loving foliage plant available in a rainbow of colours. They are very easy to grow and provide year-round vibrant colour with little or no care required. No wonder they are so popular for easy-care gardeners and landscapers! Lately we have been lucky to have a gorgeous array of new introductions to delight the eye and brighten your shade!

Description

Living Fashion Selection of Heucheras have been chosen for their performance and hardiness and their extraordinary colour range. Pictured Right from top, Heuchera 'Midnight Rose' develops bold pink splashes in spring, Heuchera 'Lime Rickey' is bright lime, prefers more shade than other darker varieties, Heuchera 'Georgia Peach' is a humidity tolerant peach selection with dark veins, and Heuchera 'Obsidian' is an unsurpassed Heuchera with good sun tolerance and jet black shiny velvet leaves. Full selection can be viewed at www.livingfashion.co.nz

Growing Situation and Care Notes

Grow Heucheras in part shade to full shade. As a rule of thumb the darker the Heuchera the less likely to burn in sunlight so give more shade to lighter foliage varieties. Protect from intense direct sunlight particularly afternoon sun. Avoid water logged soils, ensure good drainage. Water and feed occasionally with slow release fertiliser. Easy care. Hardy.

Plant Dimensions

Varied, approximately 25cm high, Width to 40cm

Plant:

Part to full shade
